3. "Partial unemployment" means the unemployment of an individual who during any week earns less than his weekly benefit amount, is employed by his regular employer, and works less than his normal customary full-time weekly hours because of a lack of full-time work.

(aw) **Wage Cross Match Audit.** The computerized quarterly cross match of benefits received by claimants and wages reported by employers to the state of Alabama.

(ax) **Wages Paid.** Wages both actually received by the worker and wages constructively paid. Wages are constructively paid when they are credited to the account of, or set apart for a worker without any substantial restriction as to the time or manner of payment or conditions upon which payment is to be made, and must be made available so that they may be drawn upon at any time, and their payment brought within his/her own control and disposition, although not then actually reduced to possession. **480-4-1-.09      Normal Commuting Area For Trade Adjustment Assistance (TAA) Purposes.**

(1) Section 617.22 of the Trade Act of 1974, as amended, requires that training must be, among other things, reasonably available and available at a reasonable cost. In determining whether or not training is reasonably available, first consideration shall be given to training opportunities available within the worker's normal commuting area. Training at facilities outside the worker's normal commuting area should be approved only if such training is not available in the area or the training to be provided outside the normal commuting area will involve less charges to TAA funds. Also, training at facilities outside the worker's normal commuting area that involves transportation or subsistence costs which add substantially to the total costs shall not be approved if other appropriate training is available.

(2) Section 617.42 states that if the worker has no reasonable exception of suitable employment in the commuting area, and has a reasonable expectation of obtaining suitable employment of long-term duration outside the commuting area, the worker may request a job search allowance.

(3) Section 617.42 states that if the worker has no reasonable expectation of securing suitable employment in the commuting area, and has obtained suitable employment affording a reasonable expectation of employment of long-term duration, or a bona fide offer of such suitable employment, outside the commuting area, the worker may request a relocation allowance.

(4) Reasonable expectation of employment of long-term duration is defined as employment accepted with the intent of being permanent employed.

(5) "Commuting area" or "normal commuting area" for Trade Adjustment Assistance (TAA) purposes is defined as a maximum of seventy-five miles one way from the worker's residence to the training facility or suitable employment. When a Training Proposal for Trade Adjustment Assistance (TAA) funded training requesting training outside the commuting area or an application for Job Search Allowance or Relocation Allowance is received, the guidelines set forth in this rule will be used to make a determination to the request.

#### 480-4-1-.10

#### **Calculation Of Average Cost And Reasonable Cost Of Trade Adjustment Assistance (TAA) Funded Training.**

(1) Section 617.22(6) of the Trade Act of 1974, as amended, requires that training be available at a reasonable cost. "Available at a reasonable cost" means that training may not be approved when the costs of the training are unreasonably high in comparison with the average cost of training of other workers in similar occupations at other providers.

(2) The cost of training which included tuition and related expenses (books, tools, and academic fees), transportation and subsistence expenses of active TAA participants is totaled and divided by the number of active TAA participants in order to determine the average cost of training. The calculation will be made as follows:

Total training costs ÷ number of active participants = the average cost of training

(3) Another factor in determining if training is available at the reasonable cost is calculated by doubling the average cost of training of active TAA participants. This calculated amount is considered to be a reasonable cost for TAA funded training and will serve as the training cap for Alabama. When a Training Proposal for TAA funded training is received and the training cost is in excess of the training cap, a determination denying the training will be issued. The calculation will be made as follows:

Average cost of training x two = reasonable cost of training
