540-X-12-.01 Definitions.

The following definitions shall apply to the rules in this chapter:

(1) Administer - The direct application of a controlled substance, whether by injection, inhalation, ingestion, or any other means, to the body of a patient by any of the following:

(a) A supervising physician, or, in his or her presence, his or her authorized agent.

(b) An assistant to physician.

(c) The patient at the direction and in the presence of the supervising physician or assistant to physician.

(2) Assistant to Physician (P.A.) - Any person who is a graduate of an approved program, is licensed by the Board of Medical Examiners, and is registered by the Board to perform medical services under the supervision of a physician approved by the Board to supervise an assistant to physician.

(3) Board - The Board of Medical Examiners of the State of Alabama.

(4) Dispense - To deliver a controlled substance to an ultimate user by or pursuant to the lawful order of a physician or Physician Assistant, including the prescribing, administering, packaging, labeling or compounding necessary to prepare the substance for that delivery.

(5) Excessive Dispensing - A registrant may be considered to have excessively dispensed a controlled substance if the Board finds that either the controlled substance was dispensed for no legitimate medical purpose, or that the amount of the controlled substance dispensed is not reasonably related to the proper medical management of the patient's illness or condition. Drug addiction shall not be considered an illness or condition which would justify the continued dispensing of a controlled substance, except in gradually decreasing dosages administered to the patient for the purpose of curing the addiction.

(6) Physician Supervision - A formal relationship between a licensed assistant to physician and a supervising physician under whom the assistant to physician is authorized to practice as evidenced by a written job description approved in accordance with Article 7, Chapter 24, Title 34, Code of Ala. 1975. Physician supervision requires that there shall be at all times a direct continuing and close supervisory relationship between the assistant to physician and the supervising physician to whom that assistant is registered. The term supervision does not require direct on-site supervision of the assistant to physician; however, it does require the professional oversight and direction as may be required by the regulations and guidelines of the Board of Medical Examiners.

7. Prescribe or Prescribing - The act of issuing a prescription for a controlled substance.

(8) Prescription - Any order for a controlled substance written or signed or transmitted by word of mouth, telephone, telegraph, closed circuit television or other means of communication by a legally competent supervising physician or assistant to physician authorized by law to prescribe and administer such drug which is intended to be filled, compounded, or dispensed by a pharmacist.

(9) QACSC - Qualified Alabama Controlled Substances Registration Certificate.

(10) Supervising Physician - A doctor of medicine or a doctor of osteopathy licensed to practice medicine in Alabama who has been approved by the Board of Medical Examiners to supervise assistants to physicians and who holds a valid, current, and unrestricted Alabama Controlled Substances Registration Certificate.

540-X-12-.18**Risk And Abuse Mitigation Strategies.**

(1) The Board recognizes that all controlled substances, including but not limited to, opiates, benzodiazepines, stimulants, anticonvulsants, and sedative hypnotics, have a risk of addiction, misuse, and diversion. It is the opinion of the Board that the best practice when prescribing controlled substances shall include medically appropriate risk and abuse mitigation strategies, which will vary from patient to patient. Additional care should be used by practitioners when prescribing medication to a patient from multiple controlled substance drug classes.

(2) Every practitioner shall provide his or her patient with risk education prior to initiating controlled substances therapy and prior to continuing the controlled substances therapy initiated by another practitioner.

(3) Every practitioner shall utilize medically appropriate risk and abuse mitigation strategies when prescribing controlled substances. Examples of risk and abuse mitigation strategies include, but are not limited to:

- (a) Pill counts;
- (b) Urine drug screening;
- (c) PDMP checks;
- (d) Consideration of abuse-deterrent medications;
- (e) Monitoring the patient for aberrant behavior;
- (f) Using validated risk-assessment tools, examples of which shall be maintained by the Board; and
- (g) Co-prescribing naloxone to patients receiving opioid prescriptions when determined to be appropriate in the clinical judgment of the treating practitioner.

(4) The Board recognizes that the best available research demonstrates that the risk of adverse events occurring in patients who use controlled substances to treat pain increases as dosage increases. The Board adopts the "Morphine Milligram

Equivalency" ("MME") daily standard as set out by the Centers for Disease Control and Prevention ("CDC") for calculating the morphine equivalence of opioid dosages. The Board further adopts the "Lorazepam Milligram Equivalency" ("LME") daily standard for calculating sedative dosing when using the Alabama Prescription Drug Monitoring Program.

(5) For the purpose of preventing controlled substance diversion, abuse, misuse, addiction, and doctor-shopping, the Board sets forth the following requirements for the use of Alabama's Prescription Drug Monitoring Program (PDMP):

(a) For controlled substance prescriptions totaling less than 30 MME or 3 LME per day, practitioners are expected to use the PDMP in a manner consistent with good clinical practice.

(b) When prescribing to a patient controlled substances of more than 30 MME or 3 LME per day, practitioners shall review that patient's prescribing history through the PDMP at least two (2) times per year, and each practitioner is responsible for documenting the use of risk and abuse mitigation strategies in the patient's medical record.

(c) Practitioners shall query the PDMP to review a patient's prescribing history every time a prescription for more than 90 MME or 5 LME per day is written, on the same day the prescription is written.

(6) Exemptions: The Board's PDMP requirements do not apply to practitioners writing controlled substance prescriptions for:

(a) Nursing home patients;

(b) Hospice patients, where the prescription indicates hospice on the physical prescription;

(c) When treating a patient for active, malignant pain; or

(d) Intra-operative patient care.

(7) Due to the heightened risk of adverse events associated with the concurrent use of opioids and benzodiazepines, practitioners should reconsider a patient's existing benzodiazepine prescriptions or decline to add one when prescribing an opioid and consider alternative forms of treatment.

(8) A violation of this rule is grounds for the assessment of a fine and for the suspension, restriction, or revocation of a practitioner's Alabama Controlled Substances Certificate or license to practice medicine.
