810-3-15-.01 General Provisions.

(1) For tax years beginning after December 31, 1997, no deduction shall be allowed for any losses, expenses, or interest deferred or disallowed pursuant to 26 U.S.C. §267. For interpretation of federal statutes adopted by the Alabama Legislature, see Rule 810-3-1.1-.01, Operating Rules.

(2) For tax years beginning after December 31, 1986, no expenses shall be allowed for any cost required to be capitalized in accordance with 26 U.S.C. §263A.

(3) An individual who is a part-year resident of Alabama may deduct expenses allowed by §40-18-15, Code of Ala. 1975, only to the extent that the expenses were paid during the period the taxpayer was a resident of Alabama. If a deduction was paid for the entire year, such as interest or taxes, and the amount actually paid while a resident cannot be determined, the taxpayer may prorate the deductible amount based on the number of months of Alabama residency.

(4) Double deductions are not permitted. Amounts deducted under one provision of this title cannot be deducted under another title.

Statutory Authority: Code of Ala. 1975, §§40-2A-7(a)(5), 40-18-15.

(2) The provisions and limitations of 26 U.S.C. §274 also apply to expenses for business travel, meals, and entertainment otherwise allowable under 26 U.S.C. §162.

(3) Unreimbursed employee business expenses and certain other miscellaneous itemized deductions are deductible only to the extent that the aggregate of the deductions exceeds 2-percent of

(4) A farmer who operates a farm for profit is entitled to deduct from gross income as necessary expenses all amounts actually expended in the carrying on of the business of farming in accordance with 26 U.S.C. §162.

(5) Alabama income tax law requires that taxpayers maintain such records as will be sufficient to enable the Department of Revenue to correctly determine tax liability. It is to the advantage of taxpayers who may be called upon to substantiate deductions to maintain as adequate and detailed records as is practical since the burden of proof is on the taxpayer to show that such deductions were not only paid or accrued but also were ordinary and necessary business expenses, as defined in 26 U.S.C. §162.

(6) For interpretation of federal statutes adopted by the Alabama Legislature, see Rule 810-3-1.1-.01, Operating Rules.

810-3-15-.06 Depletion.

(1) There shall be allowed as a deduction in computing taxable income in the case of mines, oil and gas wells, other natural deposits, and timber, a reasonable allowance for depletion.

(a) Depletion allowance for standing timber shall be computed solely on the adjusted basis of the property.

(b) Depletion allowance for oil and gas may be computed on either the cost depletion method or on a percentage of gross income from the property, see Reg. 810-3-16-.01.

(c) Depletion allowance for other exhaustible natural resources shall be computed on the cost depletion method.

(d) The basis for depletion shall be determined in accordance with §§40-18-16 and 40-18-6, Code of Ala. 1975.

(2) Annual depletion deductions are allowed only to the owner of an economic interest in mineral deposits or standing timber. An economic interest consists of a capital investment in timber or mineral in place together with recovery of the investment through production.

(a) The allowance for depletion should be equitably apportioned between the lessor and lessee. Each should compute cost depletion from his own adjusted basis; each should compute percentage depletion from his own income from the property. One may use percentage depletion while the other may use cost.

(3) Computation of depletion on basis of cost (mines, oil and gas properties). When the adjusted basis applicable to the mineral deposit has been determined under §40-18-16 cost depletion for the taxable year is computed by:

(a) Dividing the adjusted basis of the property by the number of recoverable units to arrive at the rate per unit.

(b) Multiply the rate per unit by the number of units sold in the taxable year if the taxpayer is on the accrual method, or the number of units for which payment is received if the taxpayer is on the cash method.

Cost depletion = adjusted basis X Units sold or paid for
recoverable units in taxable year

1. In the selection of a unit of mineral for depletion, preference shall be given to the customary unit or units paid for the product sold, such as tons of ore, barrels of oil, or thousands of cubic feet of natural gas.

2. The number of recoverable units is the number of units of mineral determined by geological survey to be available for recovery.

(i) After the predetermined number of units have been recovered, no cost depletion is then allowable on any excess recovered.

3. In determining the amount of the adjusted basis of the mineral deposit there shall be excluded:

(i) amounts representing the cost or value of the land for purposes other than mineral production,

(ii) the amount recoverable through depreciation and through deductions other than depletion, and

(iii) the residual value of the property at the end of operations, but there shall be included, in the

case of oil and gas wells, those amounts of capitalized drilling and development costs which are recoverable through depletion.

(4) Computation of depletion on basis of cost (timber). Only cost depletion is allowed in computing depletion of timber. The amount of depletion to be deducted during the year is the number of units of timber cut times the depletion unit. The depletion unit is the basis of the timber under §40-18-16 divided by the total depletable units (M board feet, cords, etc.). Depletion is deducted in the same year the cut timber is sold or otherwise disposed of, except that if a taxpayer elects to treat cutting as a sale, depletion is taken in the year of cutting as basis of timber cut:

Basis X units cut = depletion allowable Total depletable
units

(a) A timber account should normally be set up to include all the timber in one "block", a block being an operational unit which includes all of the taxpayer's timber which logically goes to a single given point of manufacture, or the timber which would logically be removed by a single logging development.

(b) The "total depletable units" shall be determined by a professional cruising of the timber.

(c) After the above determined number of units have been used in computing the depletion allowed, no further depletion is allowable on any excess units removed.

(5) Computation of depletion on basis of percentage of gross income (oil and gas wells). For a description of the calculation of percentage depletion, see Reg. 810-3-16-.01.

(6) Computation of depletion on basis of discovery value (mines, oil and gas properties). With respect to any property for which discovery value is the taxpayer's basis for depletion, the depletion for any taxable year shall be computed by:

(a) Determining the number of units available to be removed and the unmined value of each unit by a professional geological survey.

(b) As each unit is sold depletion is allowable at the above predetermined unmined value.

(c) When the above total predetermined units have been allowed as depletion, no further depletion is allowed on any excess units removed and/or sold.

(7) Determination of fair market value. If the fair market value of the property at a specified date is to be determined for the purpose of ascertaining the basis for depletion and depreciation deductions, such value must be determined, subject to approval or revision by the Department, by the owner of the property in the light of the conditions and circumstances known at that date, regardless of later discoveries or developments in the property or subsequent improvements in methods of extraction and treatment of the mineral product. The value sought should be established assuming a transfer between a willing seller and a willing buyer existed as of that particular date. The Department will give due weight and consideration to any and all factors and evidence having a bearing on the market value, such as cost, actual sales and transfers of similar properties, market value of stock or shares, royalties or rentals, valuation for local taxation, partnership accountings, records of litigation in which the value of the property was in question, the amount at which the property may have been inventoried in a probate court, and, in the absence of better evidence, disinterested appraisals by approved methods.

(8) Depreciation of improvements. A reasonable provision for depreciation shall be allowed with respect to tangible properties, other than land and inventory properties, which are not subject to depletion, as in the case of mines, oil and gas wells, and other natural deposits and timber. It shall be optional with the taxpayer whether the cost or other basis of the plant and equipment plus allowable capital additions and minus salvage value shall be recovered,

(a) by reasonable charges for depreciation (see Reg. 810-3-15-.05) at a rate determined by the physical or economic life of such plant or equipment, or

(b) at a rate established by the exhaustion of the wasting asset, or

(c) according to the particular conditions of the case, by a method satisfactory to the Department.

(a) Losses incurred in a trade or business, in accordance with 26 U.S.C. §165(c)(1).

(b) Losses incurred in any transaction entered into for profit, though not connected with a trade or business, in accordance with 26 U.S.C. §165(c)(2), but in the case of a non-resident, only as to those transactions within the state.

(c) Casualty and theft losses sustained during the taxable year of property not connected with the conduct of a trade or business or a transaction entered into for profit as determined in accordance with 26 U.S.C. §165(c)(3) and (h). In the case of a nonresident, the deduction shall be allowed only for the losses arising from property located within the State of Alabama and the limitations in 26 U.S.C. §165 shall be applied only with regard to the taxpayer's Alabama adjusted gross income.

(d) Losses from debts ascertained to be worthless and charged off during the taxable year of ascertainment, if sustained in the conduct of the regular trade or business of the taxpayer. The reserve method for bad debts is not allowed for individuals.

(2) For interpretation of federal statutes adopted by the Alabama Legislature, see Rule 810-3-1.1-.01, Operating Rules.

(3) Losses from personal bad debts not incurred in a trade or business, nor in a transaction entered into for profit, are not deductible.

810-3-15-.20 Federal Income Tax Deduction - Individuals.

(1) **DEFINITIONS.** For the purpose of this regulation, the following words, phrases and abbreviations have these meanings:

(a) **FIT:** Federal income tax. Depending on the method used for computing FIT (cash basis or accrual method), deductible federal income tax may include:

1. Federal income tax withheld by employers during the taxable year.
2. Excess social security or Medicare tax (FICA) and railroad retirement tax (RRTA) withheld during the taxable year and claimed as federal income tax on the federal return for the same year. Regular FICA and RRTA tax withheld cannot be claimed as federal income tax since these can only be claimed as itemized deductions.
3. All federal income tax payments made during the year for liabilities of prior years, including the previous year's payment made when the previous year return was filed.
4. All federal income tax estimate payments made during the year. Any overpayments of previous years which are applied to the current year's estimated tax are not deductible unless the overpayment is included in income as a refund of federal income tax.
5. Earned income credit of the previous year which was applied to the previous year's federal income tax liability.
6. Alternative Minimum Tax.

(b) Federal income tax does not include:

1. Federal accumulated earnings tax,
2. Self-employment taxes,
3. Social security and Medicare tax on tip income not reported to employers,
4. Tax on excess contributions to Individual Retirement Arrangements,
5. Tax (10% Additional Tax) on early distributions from a qualified retirement plan (including IRAs),

6. Tax on excess accumulations in qualified retirement plans (including IRAs),
7. Tax on excess distributions from qualified retirement plans (including IRAs),
8. Advance earned income credit payments,
9. Household employment taxes,
10. Penalties and interest.

(c) **FIT Paid:** Payment includes FIT withholdings, FIT paid by the taxpayer, and FIT paid through wage garnishments.

(d) **FIT Accrued:** Imposed FIT payable for the year.

1. The imposed FIT payable for the year is the net federal income tax liability as shown due on the federal income tax return.

2. The net federal income tax which can be deducted on the Alabama income tax return is the "Tax" amount shown on the federal income tax return as computed on federal taxable income, less all credits which reduce the amount of the taxpayer's federal income tax liability and all credits which are shown as "Payments" on the federal income tax return. In no case will the amount be reduced below zero.

(i) Examples of credits which reduce the federal income tax liability include, but are not limited to: Earned income credit (EIC); Education credits; Credit for child and dependent care expenses; Child tax credit; First-time homebuyer credit; Recovery rebate credit; etc.

(ii) Amounts shown on the federal income tax return as "Payments" which are not credits and which do not reduce the federal income tax liability include, but are not limited to: Estimated tax payments; Federal income tax withheld from Forms W-2 and 1099; Amount paid with request for extension to file; etc.

(e) **Paid or Accrued:** Either paid or accrued, but not both.

(f) **Transition Year:** The year in which the method of computing the FIT deduction is changed; i.e., from cash method to accrual method or vice versa. The change in method can be the result of taxpayer's request or a Revenue Department directive.

(g) **To Contest**: To challenge via some objective act of protest, substantiated by some affirmative evidence of denial of liability by the taxpayer.

(2) (a) **FEDERAL INCOME TAX DEDUCTION FOR RESIDENTS**: Net federal income tax may be deducted for the taxable year in which paid or accrued. Taxes are deductible only by the person or entity upon whom they are imposed. A cash basis taxpayer may allocate his federal income tax deduction on the cash basis or accrual basis. Once a method is selected, it shall be consistently applied from year to year, unless approval for a change is obtained from the Department. An accrual basis taxpayer must allocate his federal income tax deduction using the accrual basis.

(b) **FEDERAL INCOME TAX DEDUCTION FOR NONRESIDENTS**: The FIT deduction for Alabama shall be apportioned according to the ratio of adjusted gross income from Alabama sources to the total adjusted gross income from all sources (as computed under Alabama law, not federal law). Each annual FIT deduction must be computed separately. Cash basis nonresidents may compute the FIT deduction on the cash basis or may elect to compute it on the accrual basis. The election, once made, must be consistently applied from year to year unless prior written approval for a change is obtained from the Department.

(3) **CHANGE IN METHOD USED TO COMPUTE/ALLOCATE FIT DEDUCTION**:

(a) Any other change in methods must be effective with the first day of a tax year.

(b) Any tax year in which a change of methods occurs is a transition year.

(c) There are two ways the method can be changed:

1. Taxpayer request.

(i) Taxpayer's request must be in writing and must include the reason(s) for requesting the change.

(ii) The taxpayer will receive written approval if the request is granted.

(iii) A copy of the written request for a change in method and the Department's written approval must be submitted with the return.

(iv) Once a change in computation and/or allocation methods is approved, it must be consistently applied from the year of change forward.

2. Change in method required by the Department of Revenue.

(i) Effective with any tax year beginning after December 31, 1998, the Department may select the method (cash or accrual basis) used to compute the federal income tax deduction on resident and non-resident returns. Taxpayers filing a return for a year in which the Department changes the method will be considered to have been granted approval to change methods.

(ii) Pursuant to the Department's authority to select the method to be used, the Department chooses the accrual basis.

(4) **TRANSITION YEAR RULES:**

(a) Year of change from cash basis to accrual basis: Any FIT refund received must be reported as income and additional FIT paid must be deducted.

(b) Year of change from accrual basis to cash basis: Any FIT refund received during the transition year for previous tax years shall not be reported as income. Any additional tax paid during the transition year for previous tax years may not be deducted.

(c) After a change from cash to accrual method in non-transition years, refunds of previously deducted accrued taxes must be reported as income and payments of taxes for an accrual basis year, not previously deducted, may be deducted.

(5) **FOR RESIDENTS AND NONRESIDENTS USING THE ACCRUAL METHOD:**

1. Uncontested FIT is deducted in the year for which it is imposed.

2. Contested FIT is deducted in the year in which the liability becomes fixed and certain, but in no case later than the year in which the tax was actually paid. "Contested FIT" may include FIT amounts that have been changed under an amendment to or an audit of the taxpayer's federal income tax return, unless the change is properly reflected on an amended Alabama income tax return within the statutorily prescribed time for petitioning for refund.

3. Refunded FIT is reported in the year received but only if the taxpayer received a prior-year tax benefit from deduction of the FIT refunded.

4. EXAMPLE 1: A taxpayer using the accrual basis had \$1,200 withheld from his earnings during 20X8 for federal income taxes. In March 20X8, he paid \$100 additional tax on his 20X7 liability and \$200 on his declaration of estimated tax for 20X8. He paid an additional assessment of \$300 on his 20X5

income in September 20X8, thereby settling a disputed liability for 20X5. The taxpayer determined early in 20X9 that his federal income tax liability for 20X8 would be \$1,700. He had previously paid \$1,400 and, therefore, would have to pay an additional \$300. He may deduct \$1,700 accrued for 20X8 plus \$300 accrued during 20X8 on his contested 20X5 liability, for a total of \$2,000. He may not deduct \$100 paid in 20X8 on his 20X7 liability, since this amount accrued in 20X7 and should have been deducted in that year.

5. **EXAMPLE 2:** Using the same facts as in the above example, a taxpayer using the accrual basis made the same payments as listed above, except that he received a \$300 refund of 20X5 taxes, for which he received a tax benefit, in September, 20X8, thereby settling the disputed 20X5 liability. The taxpayer determined early in 20X9 that his federal income tax liability for 20X8 would be \$1,700 and that he had paid \$1,400 and would have to pay an additional \$300. He may deduct the \$1,700 accrued for 20X8. He may not deduct the \$100 paid in 20X8 on his 20X7 liability, since this amount accrued in 20X7 and should have been deducted in that year. The \$300 refund accrued during 20X8 on his contested 20X5 tax liability should be reported as income on his 20X8 return.

6. **EXAMPLE 3:** A nonresident taxpayer had adjusted gross income in 20X9 from sources within Alabama of \$10,000 and adjusted gross income from sources within and without Alabama of \$25,000. Data regarding his federal income tax is:

Federal income tax liability for 20X9	\$5,500
Withheld in 20X9	\$3,600
Paid in 20X9 on 20X9 federal estimate	\$ 800
20X8 federal tax paid in 20X9 (on estimate, final return, or otherwise)	\$ 300

For the 20X9 tax year, the ratio of adjusted gross income from sources within Alabama to adjusted gross income from sources within and without Alabama is 40% (\$10,000 divided by \$25,000). Assuming the taxpayer had consistently used the accrual method, the FIT deduction for 20X9 would be \$2,200.00 (\$5,500.00 x 40%). He may not deduct the \$300 paid in 20X9 on his 20X8 liability, since this amount accrued in 20X8 and should have been deducted in that year.

(6) **MARRIED TAXPAYERS:** For spouses who file a joint federal income tax return but separate Alabama income tax returns for the same year, the FIT deduction of each is based on the ratio of federal adjusted gross income of each to the total federal adjusted gross income of both.

1. EXAMPLE 4: Proration Based on Federal Adjusted Gross Income

	Husband	Wife	Total
Income - Salaries, wages, etc.	\$7,000	\$4,000	\$11,000
Income - Other	\$500	\$500	\$1,000
Totals	\$7,500	\$4,500	\$12,000
Ratio of income for each spouse	62.5%	37.5%	100%
Total federal income tax			\$ 2,400
Husband: \$2,400 x 62.5%	\$ 1,500		
Wife: \$2,400 x 37.5%		\$ 900	

The husband deducts \$1,500 on his state return and the wife deducts \$900 on her state return for federal income tax. Total federal income tax deducted on both state returns is \$2,400, the amount to be prorated.

810-3-15-.21 Deductions For Nonresidents.

(1) A nonresident is an individual who is a legal resident of another state.

(2) The phrase "adjusted gross income from all sources" is comprised of income which would be included in gross income if received by a resident of the State of Alabama in accordance with §40-18-14, Code of Ala. 1975, less the deductions described in §40-18-14.2.

(3) Effective for all taxable years beginning after December 31, 1997:

(a) Business-related Expenses. The following business-related expenses are deductible in computing Alabama adjusted gross income for a nonresident only to the extent that they are paid or incurred in a trade or business within the State of Alabama:

1. Ordinary and necessary business expenses in accordance with §40-18-15(a)(1),
2. Interest expense in accordance with §40-18-15(a)(2),
3. Taxes in accordance with §40-18-15(a)(3),
4. Losses in accordance with §§40-18-15(a)(4) and (5),
5. Losses from debts ascertained to be worthless in accordance with §40-18-15(a)(7),
6. Depreciation and amortization in accordance with §40-18-15(a)(8),
7. Depletion in accordance with §40-18-15(a)(9),
8. Retirement savings contributions and expenses for qualified pension plans, profit sharing plans, stock bonus plans, and annuity plans in accordance with §§40-18-15(a)(11) and (12),
9. Expenses incurred in removing barriers to handicapped persons in accordance with §40-18-15(a)(19),
10. Section 179 expenses in accordance with §40-18-15(a)(21),
11. Unreimbursed employee business expenses and expenses described at 26 U.S.C. §212 in accordance with §40-18-15(a)(23), and
12. Assistance provided to the State Industrial Development Authority in accordance with §40-18-15(a)(25).

(b) Net Operating Losses. The deduction allowed by §40-18-15.2 for net operating losses shall be deductible only to the extent that a loss arose from a trade or business carried on in Alabama. See §40-18-15.2.

(c) Property Located in Alabama - Income Subject to Alabama Tax. The following expenses are deductible in computing Alabama adjusted gross income for a nonresident only to the extent arising from property located in Alabama or transactions producing income that is subject to tax in the State of Alabama:

1. Interest expense in accordance with §40-18-15(a)(2),
2. Taxes in accordance with §40-18-15(a)(3),
3. Losses in accordance with §40-18-15(a)(5),

4. Depreciation and amortization in accordance with §40-18-15(a)(8),
5. Depletion in accordance with §40-18-15(a)(9),
6. Ordinary and necessary business expenses in accordance with §40-18-15(a)(14) and 26 U.S.C §212, and
7. Expenses incurred in removing barriers to handicapped persons in accordance with §40-18-15(a)(19).

(d) Casualty and Theft Losses. The deductible amount of casualty and theft losses allowed by §40-18-15(a)(6), which references 26 U.S.C. §165, shall be allowed only for losses arising from property located within the State of Alabama. The limitations in 26 U.S.C. §165 shall be applied only with regard to the taxpayer's Alabama adjusted gross income.

(e) Alabama Percentage of Adjusted Total Income. Nonresidents must divide the amount of their Alabama adjusted total income by the amount of their adjusted total income from all sources in order to determine the ratio of Alabama income to income from all sources. This percentage, the Alabama percentage of adjusted total income, is used to determine the deductible amount of certain expenses taken below the adjusted total income line. Alimony paid and adoption expenses are not considered in the computation of the Alabama percentage of adjusted total income - the amounts are not subtracted from either the numerator or the denominator of the fraction. See §40-18-14.2.

1. Personal Exemption and Dependent Exemption. A nonresident must prorate the personal exemption by multiplying the amount of the personal exemption by the Alabama percentage of adjusted total income. If Alabama total income exceeds the prorated amount, a Form 40NR must be filed. Dependent exemptions must be prorated in the same manner using the Alabama percentage of adjusted total income. See §40-18-19.

2. Federal Income Tax Deduction. The federal income tax deduction must also be prorated using the Alabama percentage of adjusted total income. See Rule 810-3-15-.20.

(i) If the taxpayer is filing separately on the Alabama return, but jointly on the federal return, an intermediate computation is performed before the federal income tax deduction is prorated, and the Alabama percentage of adjusted total income is not used to prorate the federal income tax deduction.

(I) The taxpayer's Alabama adjusted total income is divided by the sum of the spouse's federal adjusted gross income and the taxpayer's adjusted total income from all sources.

(II) The percentage computed in subparagraph (I) is then applied to the amount of the federal income tax liability as shown on the current federal income tax return. The result of the computation is the allowable federal income tax deduction.

3. Optional Standard Deduction. If a nonresident taxpayer elects to claim the optional standard deduction in lieu of claiming itemized deductions, the optional standard deduction must be prorated by multiplying the amount of the optional standard deduction by the Alabama percentage of adjusted total income. See Rule 810-3-15-.19.

4. Other Adjustments and Itemized Deductions. The amount allowed for the following deductions shall be limited to the amount determined by multiplying the total amount of the deduction by the Alabama percentage of adjusted total income.

(i) Interest expense in accordance with §40-18-15(a) (2),

(ii) Taxes (other than federal income tax) in accordance with §40-18-15(a) (3),

(iii) Casualty and theft losses in accordance with §40-18-15(a) (6),

(xi) Qualified long-term care coverage in accordance with §40-18-15(a)(26).

(4) Prior to January 1, 1998. Effective for taxable years beginning before January 1, 1998, the provisions of subparagraphs (3)(a) through (3)(e) of this rule were the same except:

(a) The deductions for alimony, retirement contributions, and early withdrawal of savings penalties were not deductible from Alabama income;

(b) Qualified long-term care coverage was deducted as an adjustment to income - after January 1, 1998, only the percentage applicable to Alabama income is deductible from Alabama income; and

(c) Adoption expenses were not allowable as a deduction for a nonresident - after January 1, 1998, adoption expenses are deductible according to the Alabama percentage of adjusted total income.
